Note: For 1963, district industry detail for total employment and payroll may not add to district totals, because of the inclusion of central administrative employees and payroll in the district total but not in the district industry detail.

Companies operating oil and gas field properties were permitted to make only one report for oil and gas field operations in each State, and oil and gas fields or other mining services were permitted to make only one report for all States; these reports were classified on the basis of the principal State in which the service was performed. Such reports contained employment on March 15 and other selected data by the State and district. For such operations, the State total figures shown for number of establishments represent the number of reports received which were classified in the State and those shown for number of establishments in a district represent the number of reports that indicate any operations in the specified district. All district statistics shown which were not reported separately were obtained by allocating the totals for each company on the basis of the reported district data.
See table 2A footnotes 1 and 2.
Excludes data for establishments included in manufactures.
